“Discover your talent”

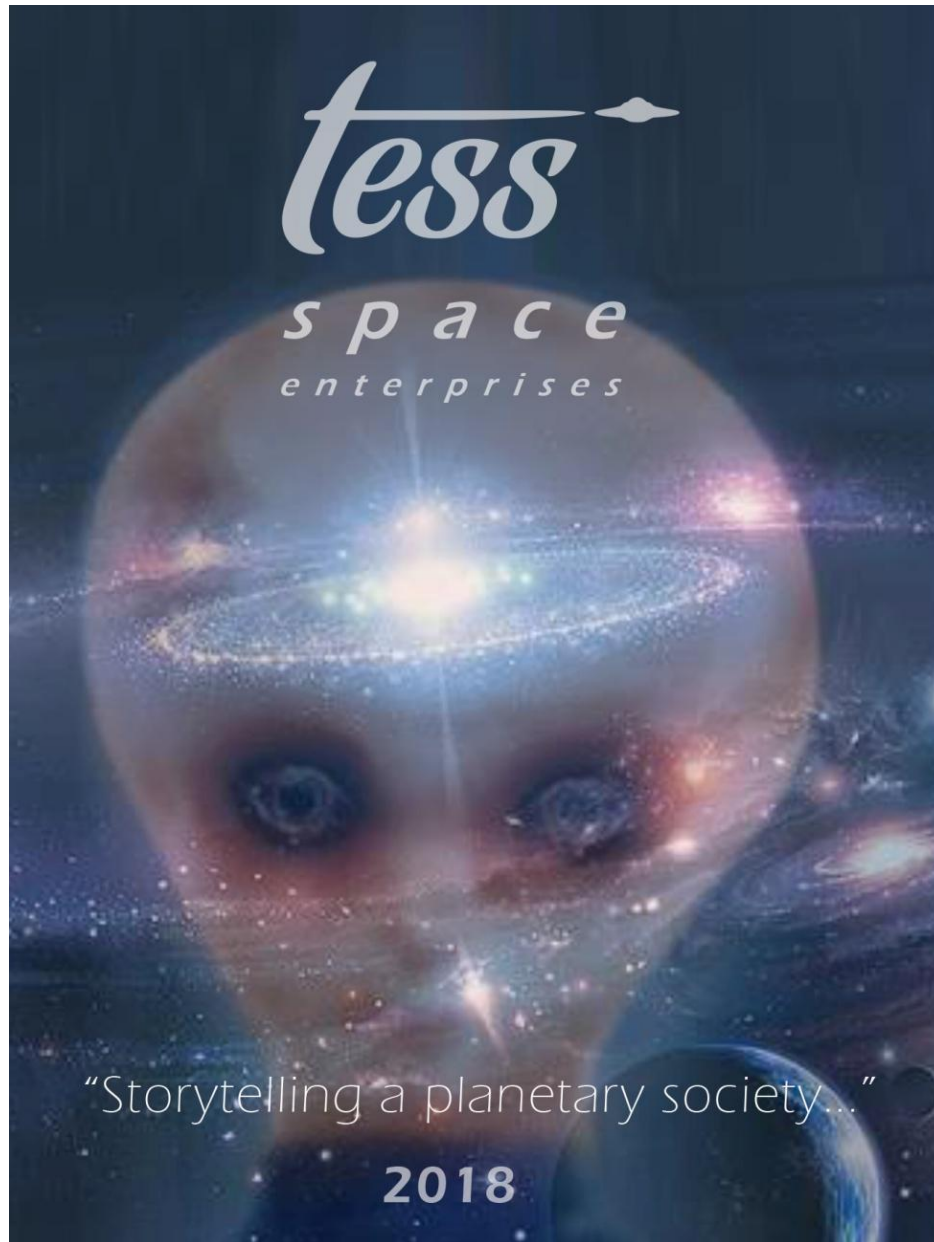

Tess University is a general educational platform to be launched in 2018 in close partnership with Tess Space Enterprises programs and its animation studios. Here, academic subjects and art forms are introduced by cool cartoony hosts bringing knowledge via documentaries on the women and men who are behind the discoveries on each subject or art form at its various stages. Such educational platform is to assist teachers around our world in having pupils and students realize the human storytelling factor and flow all Earthlings' knowledge come from. In addition to the academic subjects and art forms taught at Tess University, each host initiates discussions about a specific topic linked to the Tess Space Enterprises program its classes are associated with.

HOSTS								
Program	Pineal Tech Institute	ESP Legal	Story Galactic	Car Galactic	Soft Industry	Logos	Terra	Amnesty Intergalactic
Subject I	Biology	Social ethics	Physics	Technology	Computer	Mathematics	Chemistry	Diplomacy

Topic	Portal	Energy	Entanglement	Gravity	Intuition	Codes	Information	Soul

Dedicated to children from the 5 continents and beyond... :)

Serving as the President of the university, and as the Dean/host of the Physics and History subjects, Tess sees this educational platform as the most needed space to have Earthlings get a broad general knowledge, and, at the same time, discover their individual talent in a non competitive but rather cooperative environment, therefore offering a path for each human being to be complementary, in talent, to one another, and contribute to the creation of a planetary society on Earth.

“Joining talents for a better flow...”

Tess
